

# The Countywide Plan

*Turning Unincorporated Areas into Urban Cities*

## Sprawl Explained

## A \$5 Million Dollar "Update"

The State requires the County to have a general plan. The State **does not** require the County to *update all* parts of a general plan; the only part or "element" that requires a periodic update is the Housing Element.

So why is the County spending over \$5 million dollars to update an unprecedented plan?

San Bernardino County is broke and they want unincorporated areas to pay up with this **regional globalist plan**. The County Supervisors want to rezone unincorporated areas for high-density housing; suggest residents take on expensive bike and walking systems and embrace transit-oriented development to **save the County from Global Warming**.

**Who is going to pay for this? You!** because the County wants more future grant money and development fees at taxpayer expense. Why isn't this update being put to the vote of the people rather than being decided by just a few people in your community?

## County "Facilitators" are steering the outcome of meetings

OUR OBJECTIVE IS TO GET THE ANSWERS **WE** WANT AND MAKE THE CITIZENS **THINK** THEY'RE PARTICIPATING IN THE PUBLIC PROCESS WHILE ALL THE DECISIONS HAVE ALREADY BEEN MADE BEFOREHAND!!!
