Re: *Rancho Cucamonga Sustainability Community Action Plan (S/CAP) Project Determination*

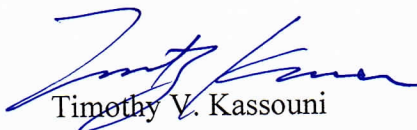

On behalf of the Foothill Taxpayers Association and residents, it is this firm's opinion that the City erred in its determination that the S/CAP is *not* a project. It is this firm's contention that:

1. Since the "project" has enforceable measures that a "reasonably foreseeable indirect physical change in the environment" can occur, it should have been a "project" under CEQA.
2. Since the "project" is tied to the SANBAG's Regional GHG Reduction Plan, it should have been determined a "project" under CEQA.

Rancho Cucamonga should voluntarily change the determination of the S/CAP to a "project." Please advise this firm no later than March 8th, 2017 as to whether the City would like to discuss a voluntary change in CEQA determination for the S/CAP.

Thank you for your attention.

Sincerely,

Timothy V. Kassouni
